📁 PROJECTS

CarBuddy [🔗](#)

CarBuddy project using PHP, MySql, HTML, AJAX , JQuery and Javascript is a web based application. It is a system design especially for large, premium and small car rental business. The car rental system provides complete functionality of listing and booking car.

Chating APP [🔗](#)

Creating a simple chating application using Android with Java this app provided a facilitate real-time communication with the help of firbase realtime Database and I have created this app on Android studio.

Plant Disease Detection [🔗](#)

A plant disease detection project utilizes image analysis and machine learning to identify and diagnose plant diseases. It involves collecting labeled plant images, training a model, and deploying it through user-friendly web platforms. This technology aids farmers in prompt disease detection and crop management, enhancing agricultural productivity.

🧩 ACHIEVEMENT

5 Star in Hackerrank Problem Solving

AIR - 359(NIMCET)
